

ATMS2023 Superintendent Information  
Update March 10, 2023

To give some clarification for state ATMS CDE:

Enviro/Natural Res.- the use of transit or level to determine slope, soil survey to determine soil characteristics

Electrical - using 2 or more devices in a branch circuit

Mach & Equip - selecting tillage equipment to use with tractor

Team activity - reading plans for farm building, layout of rafter, parts of building, and equipment

Joe Linthicum, Superintendent ATMS

January 23, 2023

Greetings all,

I can give you the general information needed to help start preparing for regional and state Ag Mechanics:

Welding – Mig welding on steel/iron

Electrical – Branch circuits

Small engine – OHV parts, operation, maintenance,  
troubleshooting using repair manual

Machinery & equipment – tillage equipment

Environmental/Natural Resources – soils with slope and leveling.

Team – Farm building construction.

Hope this is helpful. As more information becomes available, I will be more than happy to share with everyone. Joe Linthicum
